Deeb Andrawis

Cell Phone: 0528121057 | Email address: deeb.andrawis@gmail.com

Career:

- ***2023-2026*: Senior Automation Developer at D-Fend, Galil Software.**
  - **System & Integration Validation:** Executed full-flow validation for mission-critical drone detection and mitigation systems, covering the entire lifecycle from drone identification to automated mitigation actions.
  - **Data-Driven Analysis:** Utilized **Elasticsearch and Kibana** to analyze high-volume system logs, enabling deep investigation into complex scenarios such as drone trajectory, identification accuracy, and mitigation success.
  - **API & Backend Testing:** Built robust automation to validate backend services and communication layers, ensuring seamless integration between control software and SDR-based hardware modules.
  - **System-Level Troubleshooting:** Investigated and resolved complex issues by correlating backend API behaviors with system-wide event logs, ensuring high reliability across the software-hardware communication layer.
  - **Operational UI/UX Testing:** Validated complex, real-time monitoring dashboards and operational workflows to ensure high reliability for end-users in field environments.
  - **Infrastructure Ownership:** Led the MSC2 automation project, designing scalable frameworks and CI/CD pipelines that reduced manual intervention and accelerated release cycles.

- ***2021-2023*: Automation Team Lead at BigID, Galil Software.**
  - Building end-to-end test infrastructure tests using Cypress framework with Javascript for a team of over 15 QA developers.
  - Integrating Allure with Cypress to enhance test reporting and visibility.
  - Migrating all tests to work with the Page Object Model (POM) design pattern.
  - Implementing parallelism to optimize test execution.
  - Maintaining and enhancing the automation infrastructure.
  - Additional responsibilities included:
    - Working on Jenkins pipelines and Groovy files for continuous integration and deployment.
    - Setting up and configuring the testing environment using Docker and Kubernetes (K8s).
- ***2019-2020*: Senior Automation Developer at IronSource, Galil Software.**
  - Developing and implementing automation tests for IronSource using Java frameworks such as Selenium, TestNG and Gradle.
  - Refactor all tests regression and sanity, build a new infrastructure to stabilize reduce tests run time.
- ***2018-2019:* Senior Automation Developer at Shield34.**
  - Leading QA Automation development and execution at shield34.

- Developing UI Automation framework from scratch using Java Selenium and TestNG with integration with TeamCity.
- Developing UI Automation framework from scratch using Python.
- Developing Database tests using Postgres .

- ***2015 – 2018:*** **QA Automation Developer at Similar Web, Galil Software.**
  - Developing and implementing automation tests for Similar Web using Java frameworks like Selenium and TestNG.
  - Direct automation developer of Agile team, working closely with all R&D members (QA, frontend and backend developers). Taking part in all development procedures under R&D's fast paced Agile timeline conditions.
  - Build an Object-Oriented Architecture and maintain continuous integration tests using Team city.
  - Design and implement video recording capabilities, Develop automated tests for SEO Ranking, RestAPI Sanity and Full Regression.
  - Build an Automation history database with Elastic Search and Visualize it with Kibana.
- ***2011 – 2012:*** **Tutor, University of Haifa.**
  - Teaching Mathematics and Computer Science to pupils and students.
  - Tutoring in calculus, Introduction to Computer Science and discrete mathematics.
  - Private mentoring of students and providing help with academic tasks.
- ***2008-2009:*** **Computer Technician - S.S School**
  - Technical support.
  - Helping the teaching team in every computerized issue. - A tutor in ' Computer Science' Class for High School.
  - Teaching "intro to OOP" along with experienced teacher.
- **Education:**
  - ***2011–2015*** B.Sc.in Computer Science, Haifa University.
  - ***2006-2008*** Salvatorian sisters school – Nazareth, Major: Physics (5 units), Computer Science (5 Units).

Courses:

- Excellence and Leadership Program ExcelHT, JDC Israel and "It Works" Association. Technion: The program of Excellence and Leadership.
- Training in Management and leadership, business English and soft skills development.

Technical Knowledge:

Languages: Python (Advanced), Java (Advanced), JavaScript, C, C++.
Automation & Testing: Selenium, pytest, TestNG, Cypress, API Testing (REST), UI Automation.
Data & Observability: Elasticsearch, Kibana, SQL.
Infrastructure & CI/CD: Jenkins, GitLab, GitHub, TeamCity, Docker, Kubernetes (K8s).

Languages:

Arabic: Mother tongue | Hebrew: High Level | English: High Level
